

Hull Public Health Profiles 2026: Hull

Public Health Intelligence, Hull City Council
(www.hulljsna.com), March 2026

About this profile

This public health profile presents the most up to date information on a range of topics, to help us understand who lives in each area of Hull, and what their needs might be. We have also included comparisons with the Hull average, the Yorkshire and Humber average and the England average where data were available.

The sources of the information, as well some explanatory notes, are provided in the Data Sources section towards the end of the report.

We hope you find this profile useful. If you have questions or feedback, please use the contact details at the end of this profile.

Please do explore the rest of the www.hulljsna.com website, which contains information on health, lifestyles, and attitudes to these, of Hull residents. The website forms the Joint Strategic Needs Assessment for Hull (see the last page of this report for further information).

Also included on the website are the annual Director of Public Health reports for Hull, as well as in-depth survey reports from Health and Wellbeing surveys conducted across Hull among adults (in 2003, 2007, 2009, 2011-12, 2014 and 2019) and young people at secondary schools (in 2008-09, 2012, 2016 and 2024), as well as Social Capital surveys conducted in 2004 and 2009.

Summary

- In 2024 there were 275,401 residents in Hull, of whom 69,883 (25%) were aged under 20, and 42,699 (16%) were aged 65+. The population of Hull is projected to increase by 0% by 2042 to 273,116, with the largest increase seen for those aged 65+, increasing by 21% to 51,712.
- From the 2021 census, 83.9% of Hull residents were White British, 7.9% were non-British White (mostly Eastern Europeans), while 8.2% were from non-White minority ethnic groups.
- From the 2021 Census, 39,446 households in Hull were single person households (34%). There were 21,276 pensioner (66+) households in Hull of which 66% were single person households. There were 15,491 lone parent households in Hull (13%).
- From the 2021 Census, 55,741 households in Hull were living in owner occupied accommodation (48%); while 27% were renting from the council or other social landlords, with a further 24% renting from private landlords.
- 53% of the areas in Hull fall within the most deprived fifth (20%) of areas nationally. 6% of the areas in Hull fall within the least deprived fifth (20%) of areas nationally.
- 18% of households in Hull were in fuel poverty in 2023, compared with the England average of 11%.
- 38% of dependent children in Hull were living in child poverty in 2023/24, compared with the England average of 22%.
- 73% of survey respondents from Hull were satisfied with their neighbourhood as a place to live.
- 55% of survey respondents from Hull reported that their neighbourhood was one where people looked out for each other, while 19% trusted most of the people in their neighbourhood.
- The overwhelming majority of survey respondents in Hull (88%) felt safe (very safe or fairly safe) walking alone in their local area during the daytime with a similar percentage feeling safe when alone in their homes after dark (89%). However, 19% felt very unsafe walking alone in their local area after dark.
- In September 2025 the claimant count (those claiming Job Seekers Allowance or Universal Credit with requirement to seek work) for Hull was 6.4% among men and 4.5% among women; this compares with 1.5% and 1.2% for men and women across England.
- Life expectancy at birth in 2022-24 in Hull was 75.5 years among men and 80.4 years among women;
- Life expectancy at age 65 in 2022-24 in Hull was 16.8 years among men and 19.3 years among women;
- Of the 7,914 deaths among residents of Hull during 2023-2025 7% were from lung cancer, 20% were from other cancers, 25% were from cardiovascular diseases and 15% were from respiratory diseases; this compares with 5%, 21%, 24% and 15% respectively for England. The rate of preventable deaths in 2020-24 in Hull was 42% higher than for England, this difference was statistically significant.
- Smoking prevalence in Hull is 25%, higher than the England rate of 10%. An estimated 54,900 people aged 16+ in Hull are smokers.
- An estimated 56,000 people aged 16+ living in Hull are 'problem drinkers', with 18% of survey respondents binge drinking, 21% drinking more than 14 units a week, including 13% doing both.
- Around 68,200 people aged 16+ living in Hull are obese, while a further 84,300 are overweight. At 70%, the percentage of overweight or obese individuals in Hull was higher than England (64%).
- In Hull 27% of children in Reception Year during the 2022/23-2024/25 academic years, as well as 42% in Year 6, were overweight or very overweight. This was significantly higher than the England average for children in Reception Year (22%) but significantly higher than the England average for Year 6 pupils (36%).
- Around 22,800 people aged 16+ living in Hull are estimated to be at risk of social isolation (defined here as living alone and not speaking to family, friends or neighbours each day). This means that approximately 10% of individuals living in Hull may be suffering from social isolation.
- The birth rate in 2024 in Hull was 54 births per 1,000 women aged 15-44 years, which was higher than the England average of 49 births per 1,000.

Population structure (2025) [1]

2025 mid-year population estimates from the Office for National Statistics

Age (yrs)	Males	Females	Total
Under 10	16,594	15,773	32,367
10-19	18,124	17,119	35,243
20-29	18,879	17,561	36,440
30-39	21,755	21,664	43,419
40-49	17,519	16,472	33,991
50-59	16,424	16,011	32,435
60-69	14,439	14,778	29,217
70-79	9,640	10,390	20,030
80+	4,133	5,982	10,115
Total	137,507	135,750	273,257

Ethnicity (from 2021 census) [2]

Household composition (from 2021 census) [2]

Household tenure (from 2021 census) [2]

Housing type (from 2021 census) [2]

Number of people in household (from 2021 census) [2]

Number of cars or vans in household (from 2021 census) [2]

Proportion of residents who are veterans (from 2021 census) [2]

Self-reported physical health (from 2021 census) [2]

Disability (from 2021 census) [2]

Time spent providing unpaid care (from 2021 census) [2]

National quintiles if Index of Multiple Deprivation 2025 [3]

Fuel Poverty 2023 [4]

A household is said to be fuel poor if it lives in a property with an energy efficiency rating of band D or below and their disposable income (after housing and fuel costs) is below the poverty line

Child Poverty 2023/4 [5]

The proportion of dependent children under 20 years living in families in receipt of Child Tax Credits whose reported income is less than 60 per cent of the median income or are in receipt of Income Support or (Income-Based) Job Seekers Allowance.

Income-deprived Older People (60+) [6]

The proportion of adults aged 60+ in receipt of income support, income based JSA, pension credit or child tax credits

Working Age Benefits [7]

Claimant count, September 2025 (% of working-age population)

Trends in claimant count, September 2015 to September 2025 (% of working-age population)

Attitudes about the local area (2019 survey) [8]

People from different backgrounds get on well together in the local area

Problems in the local area

Satisfied with neighbourhood as a place to live

Neighbours look out for one another [8]

Trust in neighbours [8]

Frequency of using parks / green spaces in the city [8]

Feelings of safety when [8]

.... walking alone in the area during the daytime

.... walking alone in the area after dark

.... alone in own home at night

Life expectancy at birth (years) [9]

Life expectancy at age 65 (years) [9]

Under 75 Standardised Mortality Ratios 2022-2024 [10]

Under 75 SMRs* 2022-2024: Hull

Most common causes of death 2023-2025 [11]

Preventable deaths 2020-2024 [12]

Most common types of cancer diagnosed 2018-2022 [13]

Estimated back pain prevalence 2012 [15]

Highest level of qualifications (from 2021 census) [2]

Selected results from the 2019 health and wellbeing survey [16]

Hull 2019 Health and Wellbeing Survey: Hull

*England data from: (i) 2011 Census; (ii) Public Health Outcomes Framework; (iii) Health Survey for England; (iv) Statistics on Alcohol, England

Estimated prevalence of risk factors for poor health (results of the 2019 health and wellbeing survey applied to 2024 adult (16+) population [17])

Risk factor	Men (N=110,210)	Women (N=109,795)	All (N=220,005)
Smokes	29,200	25,600	54,900
Binge drinks	27,500	13,100	39,800
Excessive weekly alcohol	32,700	13,500	45,300
Problem drinking	38,500	18,400	56,000
Does not eat 5-A-DAY	91,000	84,200	174,800
Overweight	46,000	38,600	84,300
Obese	34,000	34,200	68,200
Overweight or obese	80,000	72,800	152,500
Insufficient exercise	63,700	77,500	141,800
No moderate/vigorous exercise in last week	44,200	50,200	94,700
Activities limited by long-term illness or disability	29,500	35,700	65,700
Poor mental health (SF36 0-60)	43,900	51,200	95,600
Feels very unsafe walking alone in area after dark	12,000	28,400	40,900
Wellbeing - low satisfaction score (0-4)	14,500	15,400	30,100
Wellbeing - low worthwhile score (0-4)	13,100	13,000	26,300
Wellbeing - low happiness score (0-4)	16,200	18,100	34,700
Wellbeing - high anxiety score (6-10)	30,400	37,300	68,200
Socially isolated (potentially)	10,700	12,100	22,800

Wellbeing among adults [18]

Adult smoking prevalence [18]

Excess weight among adults [18]

Excess weight among children [19]

Potential social isolation among residents aged 65+ years [20]

	Percentage (95% CI)	Estimated number (range)
Hull	18.0 (15.5, 20.9)	6,632 to 8,909

Births [21]

Population projections to 2042 [22]

Percentage of population registered to each GP practice, October 2025 [23]

Data sources

- 1 Population data from Office for National Statistics (ONS) are the most recent mid-year population estimates (www.ons.gov.uk).
- 2 Data from the 2021 census (www.ons.gov.uk/census).
- 3 The Index of Multiple Deprivation (IMD) 2025 is produced by the Department for Communities and Local Government (www.gov.uk/government/statistics/english-indices-of-deprivation-2025). The map also uses boundary files supplied by ONS.
- 4 Fuel poverty data is produced by the Department for Energy Security and Net Zero (www.gov.uk/government/statistics/sub-regional-fuel-poverty-2025-2023-data). The latest data release is for 2023. This is also indicator B17 in the Public Health outcomes Framework (fingertips.phe.org.uk/profile/public-health-outcomes-framework).
- 5 Child Poverty data published by Department for Work and Pensions. the latest data release is for the 2023/24 financial year. (www.gov.uk/government/statistics/children-in-low-income-families-local-area-statistics-2014-to-2024). This is also indicator B01 in the Public Health outcomes Framework.
- 6 Data are for 2025, from data produced by the Department for Communities and Local Government (www.gov.uk/government/statistics/english-indices-of-deprivation-2025).
- 7 Benefits data were extracted from NOMIS (www.nomisweb.co.uk) which is a service provided by ONS for detailed up-to-date labour market statistics.
- 8 Data are from Hull's 2019 Health and Wellbeing Survey of more than 4,000 adults in Hull aged 16 years and over (www.hulljsna.com/tools-and-resources/local-surveys/local-surveys-adults/).
- 9 Life expectancy was produced using mortality data from the Primary Care Mortality Data (PCMD), supplied by NHS Digital, and mid-year population estimates supplied by ONS. Life expectancy at birth and at age 65 form indicator A01b in the Public Health outcomes Framework.
- 10 Under 75 SMRs indicate whether local premature mortality rates are higher or lower than would be expected if national (England) rates applied to the local population. Death data are from the PCMD, supplied by ONS, and the population data are from ONS mid-year estimates. National mortality rates were produced using data extracted from NOMIS.
- 11 Death data are taken from the PCMD.
- 12 Deaths from causes considered preventable produced using the PCMD, ONS mid-year population estimates and an extract downloaded from NOMIS.
- 13 Data extracted from the National Disease Registration Service (NDRS) cancer dashboard (<https://digital.nhs.uk/ndrs/data/data-outputs/cancer-data-hub>).
- 14 Local data are from Hull's 2019 Health and Wellbeing Survey. Census data were extracted from OHID's Local Health website.
- 15 Modelled estimates produced by Arthritis UK and OHID, using Health Survey for England data, published by OHID on the Local Health website.
- 16 Data are from Hull's 2019 Health and Wellbeing Survey.
- 17 Data are from Hull's 2019 Health and Wellbeing Survey. Population data are the latest mid-year population estimates produced by ONS. Estimated numbers are rounded to the nearest 100.
- 18 Local data are taken from Hull's 2019 Health and Wellbeing Survey. Regional and national data are taken from the Public Health Outcomes Framework of which these are indicators C16 (excess weight), C18 (smoking prevalence) and C28 (wellbeing).
- 19 Data were extracted from OHID's Local Health website. This is also indicator C09 in the Public Health Outcomes Framework.
- 20 The definition of potentially socially isolated used here is an adult who is the only adult living in the household, and does not speak to at least one of family, friends or neighbours every day. Data are from Hull's 2019 Health and Wellbeing Survey of Adults. Population data are from the most recent ONS mid-year population estimates
- 21 Births data are supplied by NHS Digital. The birth rate per 1,000 is produced using the birth data and the latest ONS mid-year population estimates. Regional and national birth rates were calculated using births data from NOMIS and ONS mid-year population estimates.
- 22 Population projections were produced by applying the 2022-based ONS projected population changes by single year of age to the most recent ONS mid-year estimated populations, then aggregating the results by broad age band.
- 23 Figures are produced from the latest GP population estimates by lower layer super output area published by NHS Digital (digital.nhs.uk/data-and-information/publications/statistical/patients-registered-at-a-gp-practice/). The number of residents quoted in the figure may be higher than in the population table, as it comes from the GP registration file which historically tends to be higher than the mid-year population estimates presented in the population table.

Hull's Joint Strategic Needs Assessment (JSNA)

What is a JSNA?

The JSNA assesses the current and future health, care and wellbeing needs of the people of Hull.

- Joint - The JSNA is carried out jointly by NHS Hull and Hull City Council. It is the joint responsibility of the Director of Public Health, Director of Children's Services and the Director of Adult Social Services.
- Strategic - Intended to give the information that allows decision makers to make sound strategic decisions.
- Needs Assessment - Gives a scientifically robust understanding of the health and wellbeing needs of a local population for more focused commissioning and service delivery.

What will you do with the JSNA?

The JSNA will be used to inform the way in which services are organised and delivered in Hull to meet the needs of the local population. Available for strategic planning, but also micro-implementation.

What is different about the Hull JSNA?

- The JSNA is regularly updated and is a living and interactive web based resource for all the people of Hull, the Voluntary Sector, the Council, all the NHS Organisations and Trusts, the Police and Fire Service.
- The JSNA draws on information gained through local surveys, allowing for 'real' trends to be analysed based on Hull's epidemiological profile as opposed to synthetic or modelled data from national sources.
